EDUCATION

- | | |
|--|------------------------|
| University of Minnesota, Twin Cities (GPA: 4.0/4.0)
Ph.D. in Computer Science (anticipated to graduate in 06/2024)
Advisor: Dr. Catherine Qi Zhao | Sept. 2019 - Now |
| Sun Yat-sen University
M.E. in Information and Communication Engineering
Advisor: Dr. Ming Jiang | Sept. 2015 - June 2018 |
| Sun Yat-sen University
B.E. in Communication Engineering
Advisor: Dr. Ming Jiang | Sept. 2011 - June 2015 |

RESEARCH INTEREST

Computer Vision, Machine Learning, Deep Learning, Nature Language Processing

PUBLICATION

Journals

TALK

- “Leveraging Human Attention in Novel Object Captioning”, presented at *International Joint Conference on Artificial Intelligence (IJCAI)*, 2021.
- “Self-Distillation for Few-Shot Image Captioning”, presented at *IEEE Winter Conference on Applications of Computer Vision (WACV)*, 2021.

SERVICE

Review for Journals

- Journal of Visual Communication and Image Representation 2021-Now

Review for Conferences

- European Conference on Computer Vision (ECCV) 2022
- Computer Vision and Pattern Recognition (CVPR) 2022
- Winter Conference on Applications of Computer Vision (WACV) 2022, 2023
- AAAI Conference on Artificial Intelligence (AAAI) 2023

EXPERIENCE

Visual Information Processing Lab, University of Minnesota
Computer Vision, Vision and Language, Machine Learning

Sept. 2019 - Now

- Proposed a large-scale dataset enabling a family of new vision-language tasks and computational methods for understanding and solving real-life problems.
- Designed a new method to complement novel object captioners with human attention features characterizing generally important information independent of tasks.

- Designed a new deep reinforcement learning method to predict scanpaths leading to different performances in visual question answering.
- Developed an ensemble-based self-distillation method for image captioning with few paired data and a large number of unpaired images and captions.
- Designed a new method for few-shot object detection by leveraging bottom-up and top-down attention based on object-concentration loss and background-concentration loss.

Multimedia Research Center, Shenzhen Institutes of Advanced Technology Chinese Academy of Sciences Aug. 2018 - Dec. 2018

Computer Vision in Low-Shot Object Detection

- Designed a simple but effective solution for continuous low-shot detection based on architecture design (Disentangling), model initialization (Imprinting), and training methodology (Distilling).

Wireless Communication Lab, Sun Yat-sen University

Dec. 2013 - June 2018

Estimation Theory in Optical Wireless Communication

- Designed a dimming control framework achieving optimal waveform design and extended it into two different variants to acquire better performance.
- Designed an enhanced adaptive polar linear interpolation to estimate the channel information more robustly and efficiently.
- Designed a new channel estimation method and analyze its performance bound based on Bayesian MMSE estimation.

TEACHING

Teaching Assistant

- CSCI 5302: Analysis of Numerical Algorithms, Spring 2022
- CSCI 5521: Machine Learning Fundamentals, Fall 2021

HONOR

- College Science and Engineering Graduate Fellowships University of Minnesota, 2019, 2020
- National Scholarship Department of Education of China, 2013, 2017
- Outstanding Undergraduate Student Award Sun Yat-sen University, 2015
- Zhentai Scholarship Sun Yat-sen University, 2012

SKILL

Programming Language: Python, Matlab, JavaScript, HTML, C/C++, Linux shell

Tools: Pytorch, Tensorflow, Keras, Opencv, Unix/Linux, Git, Scikit-Learn, LaTeX
